# Why Install Logs and Stones?

Transform Your Electric Fireplace Experience

Adding decorative logs and stones to your electric fireplace offers multiple benefits. They enhance the realistic appearance of flames, creating an authentic hearth ambiance. You can customize the style to match your room's décor, from rustic to modern. Best of all, installation is simple and you can easily update the arrangement whenever you want a fresh look.

Why install logs and stones

# Preparation Checklist

## **Safety First**

Remove the front glass and keep it in a safe place while installing logs and decorative media.

## **Read the Manual**

Review manufacturer's instructions for your specific model.

## **Gather Materials**

Collect all logs, stones, and any tools needed for installation.

Follow these simple steps for a perfect installation:

- • **Step 1:** carefully place the logs inside the fireplace according to your personal favor. Note: do not lay all the logs flat on the ember bed tray. Arrange the logs naturally so the flames can be seen through them.
- • **Step 2:** place stones and glass crystals around the logs to fill gaps and create a natural, organic look. Important: place glass crystals directly on the ember bed so the lights can easily pass through them. Do not overfill the tray.
- • **Step 3:** add wooden chips or vermiculite by sprinkling them over the ember bed. Do not put too much and make sure the glass crystals are not covered.
- • **Step 4:** double-check stability and positioning of all pieces. Ensure logs are placed within the ember bed tray area and the front glass groove is clean.

Step 7 (right side)

Step 8 (right side)

## Step 9

- add glass crystals placed directly on the glass tray.
- add a few pieces of bark and a few tiny logs.

## Step 10

- Fill the glass tray with wood chips or vermiculite. Do not overfill. Add pine cones.

# Fireplace care & maintenance

## **Regular Cleaning**

Clean the glass twice a year using general cleaning products and methods.

## **Avoid harsh cleaners**

Do not use abrasive cleaners and harsh chemicals

## **Follow Safety Instructions**

Consult your manual and contact a professional if unsure about installation or cleaning procedures.

# Thank you
